

Committee of Council  
of Cyprus of Lorillard  
10. 26. 83

LIG-0301223

LG 2000868

[10.26.83]

1. a) Self-extinguishing  
Kongay sent w/ monkey on Thurs, 10.26.83.  
Report being Federal Express to see company  
but none of 10.24.83 distributed and  
reviewed. Discussion draft of 10.24.83  
prepared by C.F.B.  
? "Self-extinguishing bill" went under  
consideration. It will be handled.  
then 

(1)	6.1.1980	Original monkey
(2)	5. 1985	Original bill
(3)	In-story story bill	
(4)	10.24.83	Discussion Draft

  
Decided

Kongay informs/advises that monkey will  
not accept original advertising bill. Then  
If we can't reach accommodation with  
monkey, monkey will return to his  
original bill — & he will give the  
support of Wayman in full House.  
Kongay also states that the Common Committee  
of House will act on self-extinguishing bill in '83.

Comments by advertising from its original story  
bill when discussed against 10.24.83 "Discussion  
Draft"? C.F.B., then Kongay, to prepare an  
answ. <sup>copy</sup>:

- 1) Fundamental change in approach  
in advertising, cigarettes draft in
- 2) original bill vs. In-story OTI bill,  
CSC argument may 1/9/85;  
not 1/4/85. CSC probably  
would, in practicality, just as  
dominant role.
- 3) New draft focuses on cigarettes  
exclusively.

2) In ag. T.I. see, a perpetual pre-negotiation provision. Next draft has a time limit.

Prop of C&B to offer to circulate comparison memo - Company mockery - Industry #1 - being - Industry #2.

Korngay: thinks time is ripe to make a compromise with Wykay; delay provides for the ultimate outcome of delay) will probably be a worse loss.

Sugyan: thinks industry might be better served if no industry representative on Task Force in Technical Advisory Group. Reason: with participation, we will have to deliver up all info & technical know-how - & will have to make self-sufficient even to rest of countries. Smiling quality.

→ Suggest for China & others for B&W one document on one way to go w/ Industry #2 - then this will open way for Economic State-by-State etc.  
Committee can suggest framework w/ C&B to facilitate & determine a form or procedure as comparison memo.

5.44: C&B memo of 10.22.83 amended.  
No date for work-up was as yet.

(3)

2. Section Task Force Recommendations,  
With reports as to current status of effects  
of group (with - Bridge - Deller, etc.).  
With time(s) that the paper asbestos portion  
is a "... common sense ..." approach - not  
a standardized/medical/scientific approach.  
Paper setting forth asbestos portion to be  
distributed in our future, with statement  
that the citigroup ally have approved of  
same — that the other Standard and  
Individual companies' part confirms form a  
policy standpoint.  
(in European report on the literature  
review & bibliography ... "To use "... if, and  
to whom ..." we have to use same. Also,  
a citation list is being developed - with  
identification of available witnesses who will  
be required to take position the marking  
is not selective.  
— — —

1. a) Warning notice

- Korngay — no substantial development  
since 9/83 until — when 11-1 will come out of  
wayman sub committee.
- \* → 11/18/83 Adjournment date for Ragone  
today unless we receive action or  
Hold date (a wayman pic) during  
1983 earlier of Cognac.
- The Committee = Korngay  
date sure is not earlier 1/3/84  
by Agreed/understand. (42 weeks)  
Present no international development  
recommending a delay.
- \* → 1. 23. 84: Open for Cognac to re-commence

5. Dutch Association of Public Health + Smoking  
 Public speaks - in response to Dutch  
 government's demand to increase in smoking in  
 Holland - + allowing smokers to quit to  
Barclay - + the P.M. attack on same.

Peters answers what he perceives as a  
potential litigation plan.  
Hollanders attempt to answer - but not well.

6. Smoking in the Workplace

→ 10.10.83 letter → front member of T.I.  
 suggestion from Health = smoking in the workplace  
 including case forward with a model ordinance  
 to deal with future smoking in the workplace  
 ordinance or proposed ordinances.

Model Ordinance -	a) Legislative
less dangerous, smoking	b) Employer

Problem of a model ordinance is that it  
 assumes passage of at least the ordinance -  
 if not more.

Decision : Cf. 8 to draft 'model ordinance'  
 for use only by Employer/Council - not  
 even for publication to from Health Minister.

(1)

See Frances  
Tunica discusses the Radio-TV problem & the  
existing controversy over one TV station referring  
to I ad w/o identification of tobacco  
industry involvement.

Loveday - leader of anti-smoking group in  
Calif.; brought FDC complaint.

2. Spring Projects - Joe Birnbaum would  
like to have four companies on recent  
requests -

- a) Merck 10-19-83 S, H letter  
b) Coumarin Laboratories 10-20-83 S, H letter

3. Rylander Symposium -  
Shim reports generally. may report  
which requires them.
